PROFESSIONAL SUMMARY

Have a passion in AI, technology. hard working able to work independently. am creative with AI and STEM tech, willing to learn. good at design craft AI prompt for tasks, workflow automation, experience in machine learning, LLMs, create chatbots, RAG, with python coding, and make good use of latest AI tools for projects. knowledge in agentic AI, NLP, and AI agent such as openclaw, claude code able to install, set up assign skills, memories, API keys. Proficient in cloud models, API models, deployment. Have a positive attitude and enthusiastic in using AI to solve modern society problem, help improve work efficiency, passionate in sharing what I learnt in AI with people from different fields, and contribute society with AI development. inspire society to engage with human machine collaboration, help with task efficiently is my vision. experience in design course for tutoring (personal projects). Proficient in Linux, Windows, mac environment

PROJECTS HIGHLIGHT

- Built RAG chat assistant using python and streamlit (currently working on building complex agentic AI applications with LLM)
- Set up Hermes Agent, Openclaw, routing with Claude Code (currently working on agentic LLM complex tasks, automate everything, using AI agent to work 24/7)
- Built AI Expense Tracker App in SwiftUI iOS, AI Assisted Coding
- Helped with education agency create AI educational video for marketing, created Heygen Avatar for promotional material, and combine video using capcut
- Built Dify AI text to speech automation to generate short story
- Used Zapier, n8n to create simple automation workflow for booking appointment
- Built language translation application using python and streamlit
- Built neural network, simple voice agent, chatbot using python
- Built sentiment analysis application for analysis twitter tweets, with python using machine learning, NLTK
- Created comparison table for comparing subscriptions for AI video generation tool for education agency, apply AI tech to education. Helped with education agency create course materials
- Vibe coded e-commerce website, AI voice agent application, AI image generation tool using Google AI studio, Google gemini, Llmarea ai
- Vibe coded Duolingo clone app using SwiftUI iOS and Cline in vs code

EDUCATION

Higher Diploma in Cloud and Data Centre Administration
at Hong Kong Institute of Vocational Education (VTC)

Sept 2023 - Aug 2025

Bachelor Degree (Hons) 2:1 Computer Science
at The University of Essex, UK

Oct 2014 - Sept 2018

HANDS ON EXPERIENCE

Prompt Engineering and AI agent

vibe coding, AI assisted application development, agentic AI

- Proficient in Engineering prompt, craft high quality precise prompt for building AI applications and automation tools. experience in using AI agent to do tasks, assign skills.

AI content creation and report creation

- Experience in using AI to create content, such as AI avatar, creating images, videos with AI tools. Experience in generating reports, powerpoint, comparison tables with AI tools such as Google gemini.

Voice AI agent

- Experience in Building and clone AI voice agent using elevenlabs, minimax audio, text to speech synthesis. currently exploring deeper in conversational voice ai model

Machine Learning and AI training, RAG

- Good at Python programming, experience creating AI chatbot, neural network, AI training using python. Knowledge in how LLM works, and RAG.

Simple Automation workflow using zapier, n8n, booking system

AI TOOLS & SOFTWARE EXPERIENCE

- Automation: Zapier, n8n, Python, Dify AI, Google sheet automation
- Machine Learning framework tensorflow, scikit learn, pytorch, NLTK
- Software Development: VS Code, Kilo Code, Google AI Studio, Python, SwiftUI, Xcode
- AI Content creation: Hailuo AI, Nano Banana, Veo 3.1, Seedance, Capcut, Google Flow
- AI Avatar: HeyGen
- Cloud Technology automation: proficient with terraform scripts, on AWS, Google Cloud, Azure, Redhat with AI assisted scripting and deployment
- LLM and AI models: Ollama, Claude ai, Grok xAI, Gemini
- Website tools such as canva, wordpress
- AI Agent: Hermes Agent, OpenClaw, agentic workflow and LLM
- Reality Composer AR
- Cost saving AI api tools including openrouter, nvidia nim

WORK EXPERIENCE

Freelance STEM Tutor /AI tutor at Edcosys

current

System Specialist/IT Technician, HKU

Mar 2021 - Mar 2023

Department of Computer Science (Full Time)

- Provide campus computer and HVAC technical support for teacher and students at computer science department. Maintain department AV system, projectors, computer inventory, server

Technical Offer at Innovation Wing Centre, HKU

Department of Engineering, Tam Wing Fan Building (Part Time)

Sept 2021 - Aug 2022

- Assist in standby event support, set up AV system, manage broadcast system in innovation centre. Help with training users how to use tech equipments and apply creativity in innovation. including VR/AR technologies, 3d scanner, 3d printers, and update documentation, website

Assistant Technical Support Officer at

Hong Kong Economic Times Limited

Nov 2018 - Mar 2021

- Assist in helpdesk IT support for users in newspaper agency company, ensure smooth operation for newspaper production, help with software installation, software hardware troubleshooting, server maintenance, AD domain management, migration and updates.
